LinkedIn: https://www.linkedin.com/in/vighneshchopra/ **Portfolio:** https://vighneshchopra.github.io/portfolio

PROFESSIONAL SUMMARY

Performance driven Healthcare SaaS & EHR/EMR Application Support Specialist with over 7 years of expertise in L1/L2 SaaS support, incident resolution, clinical workflow optimization and SLA adherence across multi-site global healthcare systems. Proven track record acting as the Single Point of Contact (SPOC) bridging clinical end-users, software vendors, and engineering teams to resolve critical technical bottlenecks. Proficient in safeguarding healthcare compliance frameworks (DHA, HIPAA, CMS documentation requirements) and optimizing Health Information Management (HIM) workflows.

CORE SKILLS

Healthcare App Support: L1/L2 Incident & Problem Management, SLA Adherence, Root Cause Analysis (RCA), Severity Escalation Bridge, Healthcare Software Maintenance.

Release & Change Support: Patch Validation, Configuration Changes, Impact Analysis, Rollback Planning, Vendor & Engineering Coordination, Test Server Management (UAT), Systems Upgrades.

HIM Operations & Workflows: Chart Corrections, Document Lifecycle Management, Scanning/Indexing Interfaces, Clinical Documentation (DRG/APC Logic).

Technical Systems & AI: EMR Systems Integration, Anthropic/Claude Suite, Dictation/NLP Tooling, Predictive Analytics, AI-Integrated Workflows, Prompt Engineering, Knowledge Retrieval (RAG).

PROFESSIONAL EXPERIENCE

Business Relations & Customer Support Manager

Dubai, UAE (Global Exposure)
Feb 2019 – Present

Medicworks Healthcare Informatics

- **Client SPOC & L1/L2 Incident Management:** Act as the Single Point of Contact (SPOC) for all UAE clients. Investigate, troubleshoot and resolve critical technical issues within multi-site clinical EMR databases. Isolate software bugs, front end validation errors and server logs to guarantee timely service restoration according to rigid SLAs.
- **Cross-Functional Escalation Bridge:** Acted as the core operational bridge between clinical leads, healthcare administrators and backend engineering teams to isolate bugs, conduct root cause analysis (RCA) and deploy system fixes during scheduled maintenance windows.
- **HIM System Configuration & Support:** Configure clinical workflows and system templates, troubleshoot workflow issues, implement technical workarounds and replicate defects for engineering escalation.
- **Change Management & Release Validation:** Coordinate controlled application software updates and patch rollouts. Review technical specifications, conduct extensive impact analysis, manage test servers during User Acceptance Testing (UAT), and prepare system database backups for precise rollback planning.
- **Vendor & Cross-Functional Coordination:** Act as the technical liaison between hospital administrators, clinical coding teams and software vendors to orchestrate continuous upgrades, diagnostics and clinical document applications.
- **Regulatory & Coding Workflow Compliance:** Ensure full structural alignment of system data workflows with HIPAA data privacy standards, CMS documentation rules, and diagnostic framework parameters (ICD-10, CPT-4, and DRG/APC logic), facilitating smooth record integrations with regional Health Information Exchanges (Malaffi, NABIDH).
- **Operational Continuity:** Diagnose high-urgency workflow deadlocks and implement reliable technical workarounds such as field schema or interface mapping modifications maintaining charting continuity during formal engineering patch cycles.
- **Knowledge Management:** Author robust technical SOPs, system runbooks and audit ready knowledge base documentation, reducing recurring L1 technical tickets through comprehensive instructions on template adjustments and interface corrections, trained 200+ end users and delivered numerous system demonstrations.

Guest Service Associate - WelcomLEAD Program Gurgaon, India

ITC Grand Bharat Jul 2015 – Jul 2018

- Served on the foundational opening team for an award-winning luxury property, developing corporate competencies in realtime incident resolution, dual-system communications, and business operational standards.
- Managed multi-channel client inquiries, system workflows, and cross-department scheduling infrastructure using integrated enterprise POS applications (MICROS VICAS, OPERA), maintaining strict quality benchmarks.

EDUCATION

Bachelor of Arts in Tourism Studies Graduated: 2018

Indira Gandhi National Open University (IGNOU), New Delhi, India
