VIGHNESH CHOPRA

Healthcare Application Support & Operations Specialist

+91 8777826748 | vighnesh.chopra13@gmail.com | linkedin.com/in/vighneshchopra

PROFESSIONAL SUMMARY

EHR / EMR Support Specialist with 6+ years of experience managing L2 production environments, technical issue diagnosis, and functional medical workflows across healthcare settings. Acting as the dedicated Single Point of Contact (SPOC) for all UAE healthcare clients, bridging the gap between clinical operational teams and backend developers. Experienced in maintaining secure, compliant environments adhering to DHA guidelines, HL7 messaging protocols and standard data privacy frameworks. Proficient in optimizing health information management workflows, user access controls, and system data mapping.

CORE SKILLS

Healthcare Support: **EHR/EMR Deployments | EHR/EMR Support | L2 Incident Management | Troubleshooting | Root Cause Analysis (RCA) | Healthcare Software Maintenance | SLA Compliance | Cross Functional Liaison**

HIM Workflows: **Electronic Medical Records (EMR) Validation | System Access Controls | Chart Corrections | Scanning/Indexing Configurations | System Validation Rules**

Release & Operations Enablement: **Patch & Update Testing | UAT Test Management | Impact Analysis | Deployment Coordination | Rollback Planning | L3 Team Coordination | End User Training | User Guide/SOP Development**

PROFESSIONAL EXPERIENCE

Business Relations Operations & Support Executive

Medicworks Healthcare Informatics *(Dubai, UAE / Global Exposure)* Feb 2020 – Present

- **Client SPOC & L2 Technical Support:** Maintained continuous clinic workflow uptime and met 100% of rigid SLAs by serving as the dedicated UAE client SPOC, providing heavy L2 technical analysis to replicate front end errors, and streamlining L3 developer resolution by packaging comprehensive diagnostics for multi-site clinical databases.
- **HIM System Lifecycle & Customization:** Ensured accurate electronic data entry and zero workflow friction by delivering functional end-user training to 200+ users (admins, IT teams, physicians, nurses, therapists, front desk staff) and configuring physical workflows into digital templates, scanning modules, and indexing interfaces.
- **Change Management & Release Validation:** Safeguarded production systems against disruptions across software updates by managing deployment timelines, tracking patch rollouts, and coordinating UAT schedules under strict control governance.
- **Regulatory & Coding Workflow Compliance:** Sustained EMR structural alignment with regional health frameworks by acting as the technical operations liaison between hospital administrators, coding teams, and software vendors to coordinate systematic database updates for diagnostic parameters (ICD-10, CPT-4, DRG/APC logic) across regional Health Information Exchanges (Malaffi, NABIDH).
- **Operational Continuity:** Preserved hospital charting continuity by diagnosing high-urgency workflow deadlocks and implementing front-end technical workarounds, including field schema or interface mapping modifications, to prevent operational downtime.
- **Knowledge Management:** Reduced recurring frontline L1 technical support tickets by implementing clear technical SOPs, operational runbooks, and comprehensive system knowledge base documentation.

Operations & Excellence Associate

ITC Grand Bharat (WelcomLEAD Program) *(Gurgaon, India)* Jul 2015 – Jul 2018

- **Operations & Service Excellence:** Earned the WelcomAchiever award for maximum positive feedback and strict quality benchmark compliance by managing departmental documentation, resolving high-stakes conflicts, and executing service workflows via MICROS and OPERA software architectures as a foundational pre-opening team member.
